Medi9 Sanitising Wipes

Strong, durable and affordable
protection.

Medi9 Universal 225 Surface Wipes provide up to 225 applications of long lasting germ protection to any surface where the transfer of germs is a concern. The high performance sanitising wipes have been independently proven effective against bacteria, spores, viruses and fungi including Clostridium difficile, MRSA, Norovirus and Coronavirus.

Each wipe contains a gentle, alcohol free sanitising solution which leaves surfaces biologically clean and spotlessly sanitised in seconds. Non-linting and excellent dust pick up makes them ideal for housekeeping and domestic services

Medi9 Universal 225 Surface Wipes are strong and durable and are therefore suitable for cleansing and sanitising equipment, apparatus and areas of common potential infection such as commodes, patient beds and shared ward equipment.

Specifications

Product Code	WIPE-225
Wipe Size	270mm x 280mm
Contains	225 Wipes
